

The Food and Beverage Information Project

The Food and Beverage Information Project is the first comprehensive overview of the state of New Zealand's food and beverage (F&B) industry.

The five-year project analyses the main sectors in F&B, such as processed foods, dairy, and seafood, as well as providing an overview of how the industry is faring in our major markets. The information will be regularly updated and will be a vital tool for companies looking to expand and export.
