Energy Greenhouse Gas Emissions (this publication)

The *New Zealand Energy Greenhouse Gas Emissions* report provides detailed inventory information on emissions of carbon dioxide equivalent from New Zealand's energy sources arising from human activities. It also includes estimates of carbon dioxide emissions from chemical processes used in industry. This is the first time a summarised hard copy version is available.

The publication appears annually (ISSN 1173-6771), with a base year of 1990. The latest edition covers the calendar years 1990-2006. It is available in hard copy for \$40 (excluding GST) or may be downloaded free of charge at the Energy Information and Modelling website. All tables are also available from the MED's website at <http://www.med.govt.nz/energy/ghg/>.

Energy in Brief

Energy in Brief June 2007 provides a handy pocket-sized summary and concise graphical representation of key energy data up to December 2006. It (ISSN 1177-2816) includes the Energy Flow Diagram showing energy flows for calendar year 2006. One hard copy version is available for free and additional copies cost \$10 each excluding GST. It is also available on-line (free of charge) including the publication's main tables in Microsoft Excel™ format from the MED's website <http://med.govt.nz/energy/eib/>.

Energy Outlook

The *New Zealand Energy Outlook* is designed to be a starting point for anyone wanting to become more informed about the energy choices New Zealand faces. The publication gives 25-year projections of New Zealand energy supply, demand, prices and greenhouse gas emissions under a variety of assumptions. In addition to projections, *Energy Outlook* provides essential background on every form of commercial energy, on each category of demand, and on the relationship of energy to climate change. The latest edition of *Energy Outlook* was released in September 2006 and covers the years to 2030.

The publication (ISBN 0-478-28482-9) may be downloaded free of charge from the MED's website at <http://www.med.govt.nz/energy/eo/>. Hard copies are available for \$90 plus postage and GST.

Energy Data File

The *New Zealand Energy Data File* provides comprehensive statistics and supporting information on New Zealand's energy supply, demand and prices, mostly as national aggregates. It includes annual data from 1974, with quarterly data and annual energy balances for the more recent years. Oil and gas reserves information is also included.

It is published annually (ISSN 0111-6676) with a calendar year end focus. The latest edition includes data up to 2006 calendar year (with detailed electricity statistics for the 2006 March year). The hard copy version is available at a price of \$60 excluding GST. It is also available on-line (free of charge) including the data tables from the MED website at <http://www.med.govt.nz/energy/edf/>.
